1. Data based on BrightCove Pro Account. BrightCove has three packages, all with different features and pricing.
2. Data based on Ooyala Director. Ooyala has three packages, all with different features and pricing.
3. Data based on BitsOnTheRun Stretch. BitsOnTheRun has four packages, all with different features and pricing.
4. Data based on TechCrunch articles. Price is a starting point. Additional support will cost more.
5. Data could not be found on their website.
6. Price based on traffic. For a TB extra you will be charged \$ 250.
7. Per GB you will pay an additional \$ 50.
8. For best comparison the figures are based on a 10 minute video converted into multiple formats.
9. This quality is only available for our premium content partners.
10. Via the API it's possible to upload more than 50MB.
11. File types other than FLV need to be converted with BrightCoves Publishpod first.
12. Ooyala is buying gaps in CDN, therefore they are cheap.
13. Web HD (WHD) has a bitrate of 2500kbps with a widescreen aspect ratio of 16:9, a vertical resolution of 720 pixels and a horizontal resolution of 1280 pixels.
14. Only available with most expensive 'studio' package.
